Interaction Design

CAR Tables (Control-Action-Response) were used (on right of image) to designate recommendations by UX Designers to the Home Accounts pages. An ongoing feature development for improved usability. Graphics were developed by both UX Designers and Visual Designers in collaboration. This product was produced in an Agile telecommuting environment.

This is not pixel-perfect design. See the mockup comps or contact the visual designer assigned to your project. The clickable areas don't represent browser-perfect interactions. See the CAR tables or contact the interaction designer assigned to your project.

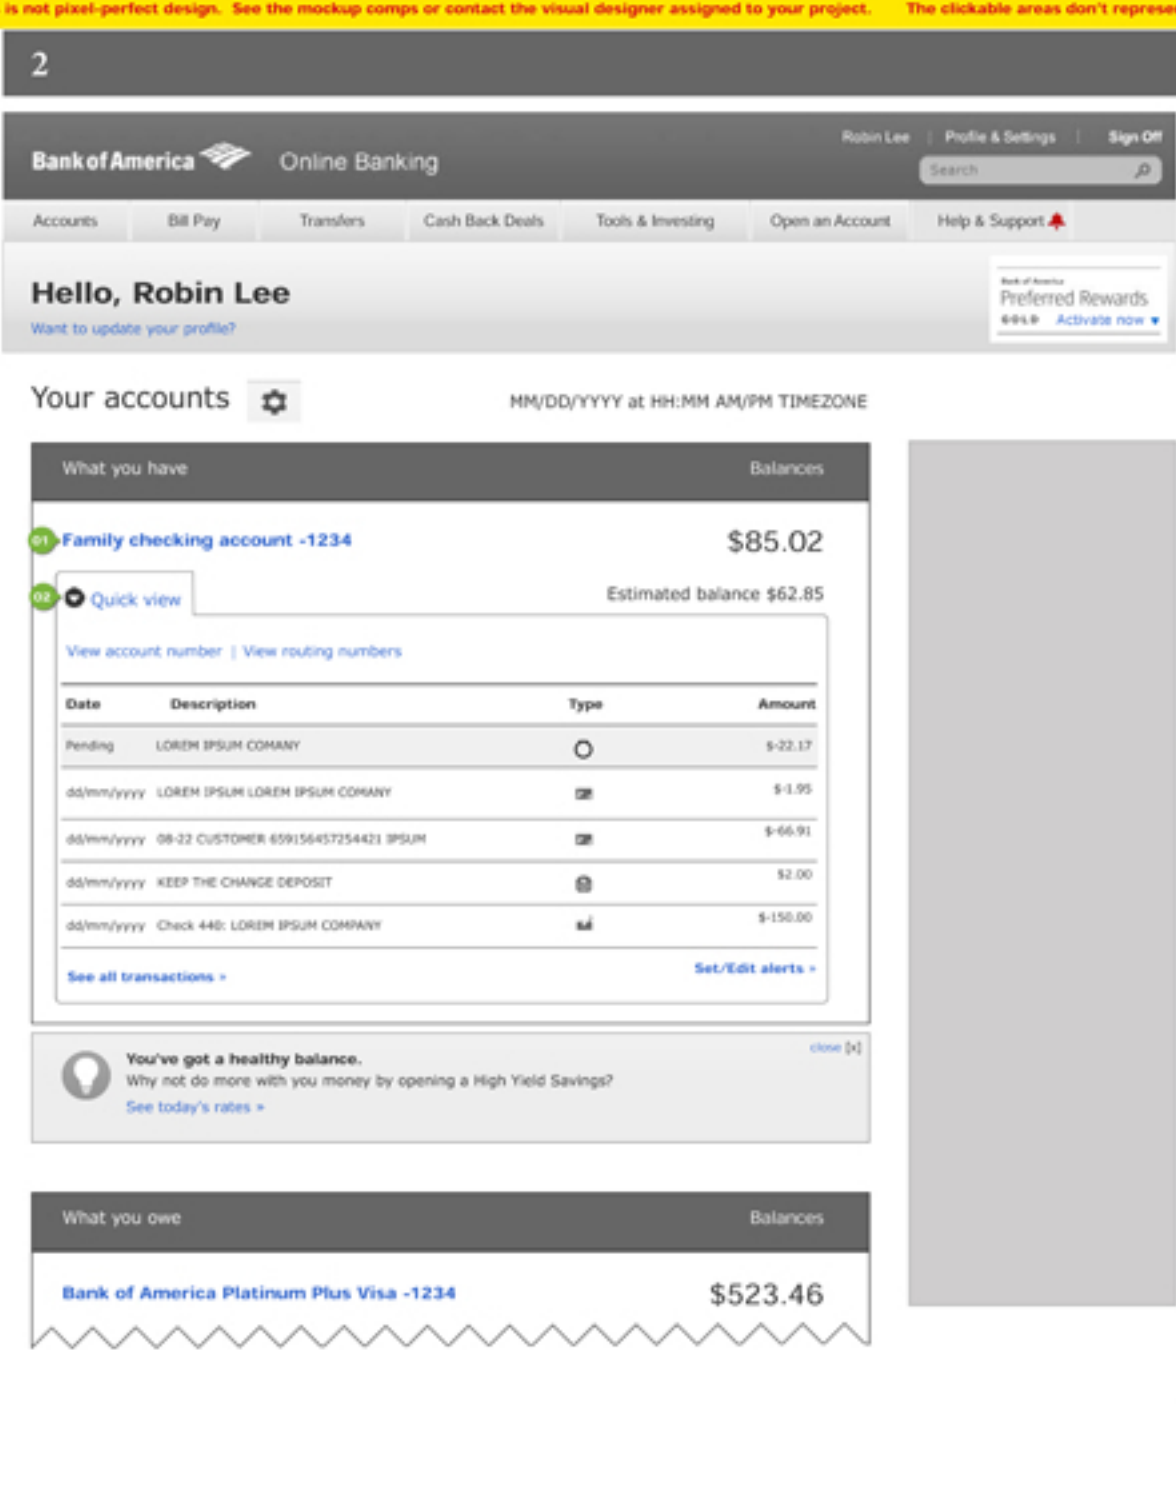

Page Information					
Page Title	Primary Page - Common Topics
